Hand and foot-operated folder

 # 00312315

Manual folding machines - HS-2AS

The HS 2AS and HS 3S models are similar to the standard HS 2A and HS 3 machines in design but are fitted with a segmented clamping beam for box and pan work.

The sharp nose segments can accommodate box profiles with a maximum edge height of 22 mm.

The individual segments are mounted on a slide bar making it very easy to switch between standard straight folding and box and pan profiles.

Both models can convert from segments to low sharp nose blade.

Accessories:

Back gauge, radius blade R = 1,5 mm and R = 2,5 mm and ERGO unit.
