Motorised roller - heavy version

 # 15110890

Motorised bending rollers - MRM 3050-200

The MRM-S Heavy Duty Motorized Bending Rolls MBM-S is constructed with solid steel gable-ends, and with modern soft radius, clean surface design.

The range of MRM-S Bending Rolls can accommodate sheets from 1050-3050mm and up to 10.0mm thickness in Mild Steel.

With both upper and lower rolls being driven, the marking of materials through slipping rolls is easily avoided. In addition, the high polished finish helps to prevent damage to pre-finished components, even with highly sensitive materials.

The MRM-S bending rolls are ideal for working with Aluminum, particularly for, air conditioning channels, advertising panels and sheet metal covers.

SCANTOOL GROUP Industrivej 3-9, 9460 Brovst +45 98 23 60 88 info@scantool-group.dk

HM MACHINERY

Standard Equipment:

- Well-equipped shafts made from certified steel with SAE 1050 (CK-45)
- Hain and belt driven spiral type reducer with cogged fittings and driven up and bottoms
- Stoned and hardened rolls
- Steel construced machine body ST-53
- Rear roll motor
- Digital display for rear roll
- Manuel extensile up roll
- Cone bending roller
- Support System for top roll
- Central lubication system
- Mobile electrical control panel
- According to CE standards
- User manual

Product Specification

Capacity (mm)	3070 x 5,0
Sheet thickness steel (mm)	5,0
Prebend (mm)	4,0
Roller Ø	ø200
Min. bending diameter (mm)	ø300
Roller speed (m/min.)	5,0
Motor (kW)	4,0/2,2
Length (mm)	4950
Width (mm)	1120
Height (mm)	1380
Net weight (kg)	5100
