Tube deburring machine

 # 00205025

Tube deburring - ZP 45

The HM model ZP 45 Tube deburrer can remove burrs from both the inside and outside of tubes in one operation, thereby reducing deburring work-time significantly.

The rotary wire brush is mounted directly onto a two-speed motor.

The ZP 45 ensures perfect deburring every time of both ferrous and non-ferrous metals.

The machine is provided with supports for both round and square tubes, and an adjustable eye shield.

The machine comes complete with a 0.5mm wire wheel and base.

The machine is manufactured in accordance with the EC-machine directive, and a separately powered dust extractor with a special mounting plate can be supplied as optional equipment.

HM MACHINERY

Product Specification

Rpm	1400/1700 - 2800/3300
Voltage	3x400V-50 Hz
Motor (kW)	2,2/3,0
Working height (mm)	920
Flap wheels (ø mm)	250x45
Number of spindle speeds	2
Length (mm)	460
Width (mm)	420
Height (mm)	1160
Net weight (kg)	75
